**\*Lincoln Parts International, LLC exclusive:** Mark III vinyl tops were originally equipped with Cavalry Twill that was wide enough to put the outboard seams in their proper location. This wide material is no longer available anywhere in the width necessary for a Mark III, so we have two pieces of narrow material heat sealed together for a "virtually" invisible seam that puts the outboard seams in their proper location using the correct grain material. Some colors available.

1965-80s	All models, various grains (not listed below) black or white .....	colors add \$35.00	195.00
1968-71	Mark III Cavalry Twill ( <b>* see above note</b> ) .....	call for availability	400.00

don't list many of the used items in the catalog since there would be way too much to include. If you don't see it...call and ask!!!

Q: What forms of payment do you accept?

A: We accept all the major credit cards including: Visa, MasterCard, American Express and Discover. With first time customers, the shipping address and the billing address (where your credit card statement goes) must be the same. We do COD's with a valid driver's license number. You are also welcome to send a check/money order in advance, just be sure to include all the personal information listed above so we know where to send your parts to.

Q: Some of the parts are listed on an exchange basis. How does this work?

A: Many of the parts that we sell are rebuilt. In order to have a rebuilt part for the next customer, we need to get your old part back. We charge a "core deposit" that is refunded when we get the original part back from you. Core charge amounts will vary based on the rarity of the part. It is the customer's responsibility to get the cores back.

Q: How and where will you ship?

A: For shipments within the United States we ship using UPS ground and Priority Mail (through the U.S. Post Office). Whichever is less expensive will usually determine the method. Next Day, Second Day and Three Day Air services are also available for additional charges. Please tell us if it needs to get there quickly.

Shipping outside the United States will go UPS, BAX Global, Roadway Express or through the U.S. Post Office. Generally, we use whichever method is the cheapest unless the customer specifies which to use. We will gladly ship anywhere in the world that freight service is available.

Q: Some of the parts are listed as being paintable, dye-able or as spray dye-to-match. How does this work?

A: Colors are limited on many of the parts that we sell both new and used. Spray dyeing is different from regular painting, in that paint only sits on top of the surface being dyed. Spray dye will penetrate the pores of the vinyl, plastic or leather being spray dyed. The properly applied spray dye is extremely durable on both interior and exterior trim pieces and should last the life of the car. Spray dye is applied much like paint in that it is shot from either a spray gun or aerosol can. Follow directions on the can for best results. The brand we've had the most luck with is S.E.M. which should be available from the automotive paint supply stores in your area. They will be able to mix any color you would want in addition to putting it into aerosol cans if you don't have professional spray equipment.

Q: Some of the parts are listed as being NOS. What does this mean?

A: NOS stands for "new old stock". Broken down, it means that a particular part is new (never been installed). The part is old but still in the original box (preferably). The part was made by the original equipment manufacturer, which is in most cases - Ford, Lincoln or MotorCraft.
